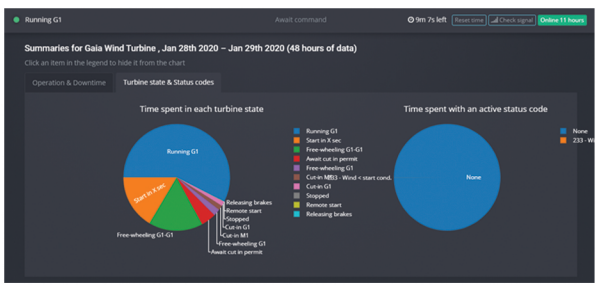
ONLINE MONITORING

REMOTELY MONITOR YOUR INVESTMENT



Ryse Energy are proud to offer Windsync™ by Visual Wind. This remote monitoring system and subscription allows you to monitor your wind turbine remotely via any internet connected computer or android/IOS device using the Windsync Application.

Online Monitoring gives you a way to keep up to date with how your turbine is behaving. You can monitor the instantaneous power and wind speed, view the energy produced per day, week, or month. Check on the current status of the machine, and receive email alerts when your turbine goes offline for any reason. Enjoy more control of your turbine with remote stop, start & reset functions available to you and your reseller.

24/7 ACCESS

Accessible at all times via web browser or app

REAL-TIME FLEET MONITORING

Wind speed, current power, generation RPM plus active stat codes

SCADA DATA ANALYSIS

Total generation, average wind speed, performance loss, downtime loss, power curve plot and time series plot

EVENT LOG & ANALYSIS

Service techs can remotely view your turbine history to analyse errors, reducing the need for call outs
